THE LABOUR FORCE, QUEENSLAND, FEBRUARY 1984

PHONE INQUIRIES For more information about these statistics please contact Bevin Morris on Brisbane (07) 33 6277.

For other inquiries, including copies of publications, please contact Information Services on Brisbane (07) 33 6351.

MAIL INQUIRIES Please write to Information Services, ABS, Statistics House, 345 Ann Street, Brisbane, Q. 4000.

Main Features

- In February 1984, the labour force in Queensland was estimated to be 1,123,100 and comprised 713,300 males and 409,800 females, including 222,200 married females.
- Employed persons in February 1984 totalled 1,008,500. Males numbered 641,400 and females 367,200. Of the females, 206,900 were married.
- The estimated number of persons unemployed in Queensland in February 1984 was 114,600 or 10.2 per cent of the labour force. Of this total, the number of persons looking for part-time work was estimated to be 13,600.
- Of the total unemployed, 31,200 persons, or 27.2 per cent, were in the 15 to 19 years age group. This represents an unemployment rate of 21.8 per cent for this age group.
- The estimated number of persons looking for their first job in February 1984 was 16,500 or 14.4 per cent of all unemployed persons in Queensland.

15 Unemployed Persons by Duration of Unemployment, Queensland, November 1982 to February 1984	21
16 Unemployed Persons by Age, Queensland, February 1984	22

Explanatory Notes

Estimates in this bulletin have been revised and are now based on 1981 Census benchmarks.

General

The Population Survey. The survey is based on a multi-stage area sample of private dwellings and non-private dwellings (hotels, motels, etc.) and usually covers slightly more than two-thirds of 1 per cent of the population of Queensland. Commencing with the survey in February 1978 the population surveys have been conducted monthly. Previously the surveys were conducted in February, May, August, and November each year. The information is obtained from the occupants of selected dwellings by carefully chosen and specially trained interviewers. The interviews are generally carried out during a period of two weeks beginning on the Monday between the 6th and 12th of each month.

Scope. The survey includes all persons aged 15 years and over except: (a) members of the permanent defence forces; (b) certain diplomatic personnel of overseas governments, customarily excluded from Census and estimated populations; (c) overseas visitors holidaying in Australia; and (d) members of non-Australian defence forces (and their dependants) stationed in Australia.

Classification of the Labour Force. The labour force classification used in the surveys conforms closely to that recommended by the Eighth International Conference of Labour Statisticians, 1954. The labour force category to which a person is assigned depends on his actual activity (i.e. whether working, looking for work, etc.) during a specified week, known as survey week, which is the week immediately preceding that in which the interview takes place. The principal categories of the labour force appearing in tables in this bulletin are defined as follows:

The Labour Force comprises all persons aged 15 years and over who, during the survey week, were employed or unemployed.

(1) Employed persons

(a) comprise all those aged 15 years and over who, during the survey week:

- (i) worked for one hour or more for pay, profit, commission, or payment in kind in a job or business, or on a farm (including employees, employers, and self-employed persons); or
- (ii) worked 15 hours or more without pay in family business or on a farm (i.e. unpaid family helpers); or
- (iii) were employees who had a job but were not at work and were: on paid leave; on leave without pay for less than four weeks up to the end of the survey week; stood down without pay because of bad weather or plant breakdown at their place of employment for less than four weeks up to the end of the survey week; on strike or locked out; on workers' compensation and expected to be returning to their job; or receiving wages or salary while undertaking full-time study; or

- (iv) were employers or self-employed persons who had a job, business, or farm, but were not at work.
- (b) can be classified into:

- (i) full-time workers, i.e. those who usually work 35 hours or more a week and others who, although usually part-time workers, worked 35 hours or more during the survey week; and
- (ii) part-time workers, i.e. those who usually work less than 35 hours a week and who did so during the survey week. When recording hours of work, fractions of an hour are disregarded.

(2) Unemployed persons are those aged 15 years and over who were not employed during the survey week, and:

(a) had actively looked for full-time or part-time work at any time in the four weeks up to the end of the survey week and:

- (i) were available for work in the survey week, or would have been available except for temporary illness (i.e. lasting for less than four weeks to the end of the survey week); or
- (ii) were waiting to start a new job within four weeks from the end of the survey week and would have started in the survey week if the job had been available then; or

(b) were waiting to be called back to a full-time or part-time job from which they had been stood down without pay for less than four weeks up to the end of the survey week (including the whole of the survey week) for reasons other than bad weather or plant breakdown.

Persons Not in the Labour Force are those who, during the survey week, were not in the categories employed or unemployed as defined. This category therefore includes persons who were keeping house (unpaid), attending an educational institution (e.g. school or university), retired or voluntarily inactive, permanently unable to work, inmates of institutions, trainee teachers, members of contemplative religious orders, and persons whose only activity during the survey week was jury service or unpaid voluntary work for a charitable organisation, provided they had not actively looked for work in the four weeks up to the end of the survey week, and

(a) in the survey week:

- (i) were without a job, business, or farm; or
- (ii) had worked for less than one hour for pay, profit, commission, or payment in kind; or
- (iii) had worked for less than 15 hours without pay in a family business or farm; or

(b) had been stood down without pay for four weeks or more up to the end of the survey week.

Industry Classification. Industry is classified according to the Australian Standard Industrial Classification (ASIC), 1978.

Occupation Classification. Occupation has been classified according to the Classification and Classified List of Occupations, revised June 1981.

Explanatory Notes (continued)

The Brisbane Statistical Division comprises the Cities of Brisbane, Ipswich, Logan, and Redcliffe, the Shire of Redland, and parts of the Shires of Albert, Beaudesert, Caboolture, Moreton, and Pine Rivers.

Population Benchmarks. Labour force survey estimates of persons employed, unemployed, and not in the labour force are calculated in such a way as to add up to the independently estimated distribution of the population aged 15 years and over by age and sex. This procedure compensates for under-enumeration in the survey, and leads to more reliable estimates. The independent population statistics (benchmarks) are the latest available estimates at the time the labour force survey is conducted, but they usually differ from the official population estimates subsequently published in the ABS publication "Australian Demographic Statistics Quarterly" (Catalogue No. 3101.0) because they are necessarily derived from incomplete information about population changes.

Revision of Series. Survey estimates are not revised for the usually small amendments of population benchmarks arising from new data on deaths and overseas and internal migration. Revisions are made, however, after each Census of Population and Housing and when population estimation bases are reviewed. Survey estimates back to February 1978 have been recalculated to conform to revised population estimates which take account of results of the 1981 Census.

Following the change in official population estimates to a place of usual residence basis from the 1981 Census, the population benchmarks used in this revision of labour force survey estimates are compiled according to place of usual residence. For an explanation of the new conceptual basis of population estimates see "Population Estimates: An Outline of The New Conceptual Basis of ABS Population Estimates" (Catalogue No. 3216.0). To co-ordinate with the new benchmarks, the labour force survey questionnaire was changed in October 1982 to enable identification of each respondent's place of usual residence. The revised estimates shown in this publication from October 1982 onwards are thus wholly according to place of usual residence. Prior to October 1982, the estimates are based on a combination of place of enumeration and place of usual residence. Persons who are away overseas from their usual residence for less than six weeks at the time of interview are generally enumerated at their usual residence when relevant information can be obtained from other usual residents present at the time of the survey. Persons who, at the time of interview, are overseas for six weeks or more but for less than 12 months are included in the estimates on the assumption that their labour force characteristics are similar to those of the persons responding in the survey.

Comparability of Series. As noted above, estimates from February 1978 have been revised to conform to revised population estimates and are thus not strictly comparable with estimates for periods prior to February 1978 which have not been revised.

Technical Notes

Estimation Procedure. The estimates are derived from the monthly population survey by use of a complex ratio estimation procedure, which ensures that the survey estimates conform to an independently estimated distribution of the population by age and sex, rather than to the age and sex distribution within the sample itself.

Reliability of the Estimates. Since the estimates in this bulletin are based on information obtained from occupants of a sample of dwellings they may differ from the figures that would have been obtained if all dwellings had been included in the surveys. One measure of the likely difference is given by the standard error which indicates the extent to which an estimate might have varied by chance. There are about two chances in three that a sample estimate will differ by less than one standard error from the figure that would have been obtained if all dwellings had been included and about 19 chances in 20 that the difference will be less than two standard errors. Space does not allow for the separate indication of the standard errors of all estimates in this bulletin. Standard errors for general application are given in Table A following. These figures will not give a precise measure of the standard error of a particular estimate since they are averages based on calculations for a limited number of past surveys over a wide range of labour force characteristics. They will provide an indication, however, of the magnitude of the standard error of any particular estimate for any particular survey. An example of the use of Table A is as follows: If the estimate for Queensland obtained from the sample is 20,000 the standard error is 1,500, i.e. there are about two chances in three that the true figure is within the range 18,500 to 21,500 and about 19 chances in 20 that the true figure is between 17,000 and 23,000.

The standard errors of estimates relating to agricultural employment are generally somewhat higher than the standard errors of other estimates of the same magnitude. Estimates for females also tend to have higher standard errors than estimates of equivalent size for males in similar employment categories.

The reliability of an estimated percentage, computed by using sample data for both numerator and denominator, depends upon both the size of the numerator and the size of the denominator. The per cent standard error of the estimated percentage, however, will generally be lower than the per cent standard error of the estimate of the

Explanatory Notes (continued)

numerator. The per cent standard errors of the numerators can be obtained from Table A.

As the standard errors in Table A show, the smaller the estimate the higher is the relative standard error. Very small estimates are thus subject to such high standard errors (relative to the size of the estimate) as to detract seriously from their value for most reasonable uses. In the tables in this bulletin, estimates below the level shown in Table A (3,500) have not been included. Although figures for these small components can in some cases be derived by subtraction, they should not be regarded as reliable.

Table A

Size of estimate	Standard errors	Per cent of estimate
persons	No.	%
(a) 3,500	740	21.1
4,000	780	19.5
4,500	820	18.2
5,000	860	17.2
6,000	930	15.5
10,000	1,200	12.0
20,000	1,500	7.5
50,000	2,200	4.4
100,000	2,800	2.8
200,000	3,600	1.8
300,000	4,100	1.4
500,000	4,800	1.0
1,000,000	5,900	0.6

(a) Estimates below 3,500 have not been published (see text above).

The movement in the level of an estimate is also subject to sampling variability. The standard error of the movement depends on the levels of the estimates from which the movement is obtained rather than the size of the movement.

An indication of the magnitude of standard errors of monthly movements in the Queensland estimates is given in Table B. The estimates of standard errors of monthly movements apply only to estimates of movements between two consecutive months. Movements between corresponding months of consecutive years or between two other non-consecutive months will generally be subject to somewhat greater sampling variability than is indicated in Table B. A guide to the standard errors of quarterly movements since February 1978 can be obtained by multiplying the corresponding figure for monthly movements by 1.4.

The imprecision due to sampling variability, which is measured by the standard error, should not be confused

with inaccuracies that may occur because of imperfections in reporting by interviewers and respondents. Inaccuracies of this kind are referred to as the non-sampling error, and they may occur in any enumeration, whether it be a full count or only a sample. Every effort is made to reduce the non-sampling error to a minimum by careful design of questionnaires, intensive training and supervision of interviewers, and efficient operating procedures.

Table B

Size of larger estimate	Standard errors of estimates of monthly movements	Size of larger estimate	Standard errors of estimates of monthly movements
3,500	730	50,000	1,700
4,000	760	100,000	2,100
4,500	790	200,000	2,500
5,000	820	300,000	2,800
6,000	880	500,000	3,200
10,000	1,000	1,000,000	3,800
20,000	1,300

"Monthly Summary of Statistics" (1304.3)

All publications produced by the ABS are listed in the "Catalogue of Publications" (Catalogue No. 1101.0) which is available from any ABS Office.

Unpublished Statistics

The ABS can also make available certain labour force statistics which are not published. Where it is not practicable to provide the required statistics by telephone, they may be available in other forms, such as microfiche, photocopy, computer printout, or clerically extracted tabulation. A charge may be made for providing unpublished statistics in these forms.

For further information on these unpublished statistics contact Bevin Morris by telephoning Brisbane (07) 33 6277, or write to Information Services at the address below.

Symbols and Other Usages

* Subject to sampling variability too high for most practical uses. (See text above regarding Reliability of the Estimates.)

.. Not applicable.

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

Unemployment Rates (a), Queensland, November 1980 to February 1984

(a) The unemployed in each group as a percentage of the civilian labour force in the same group.

(a) Civilians 15 years of age and over.

(b) Monthly figures not shown are available on request.

(c) Employed persons in each category (full-time males, part-time males, etc.) as a proportion of all employed persons in the corresponding sex/marital status group (i.e. males, married females, all females, or persons).

Table 9 - Employed Persons (a) by Industry Division and Status of Worker, Queensland, February 1984
('000)

Industry division and status of worker					Males	Married females	Other females (b)	All females	Persons
Agriculture, forestry, fishing, and hunting	..				59.0	15.9	3.6	19.5	78.4
Mining	19.6	*	*	*	21.9
Manufacturing	108.5	17.5	12.4	30.0	138.5
Electricity, gas, and water	16.0	*	*	*	18.1
Construction	70.6	7.0	*	9.1	79.8
Wholesale and retail trade	122.9	50.7	47.4	98.0	220.9
Transport and storage	62.5	4.7	*	7.9	70.5
Communication	15.5	*	*	5.1	20.6
Finance, property, and business services	46.2	21.6	18.5	40.1	86.3

Community services	63.7	55.9	44.3	100.2	163.9
Recreation and personal and other services	29.0	23.1	17.8	40.9	69.9
<u>Total employed</u>	641.4	206.9	160.3	367.2	1,008.5
Wage and salary earners	511.3	152.2	153.3	305.5	816.8
Other (c)	130.1	54.7	6.9	61.7	191.7

(a) Civilians aged 15 years and over.

(b) Never married, widowed, and divorced.

(c) Employers, self-employed, and unpaid family helpers.

Table 10 - Employed Persons (a) by Occupation Group, Queensland, February 1984
('000)

Occupation group					Males	Married females	Other females (b)	All females	Persons
Professional, technical, and related workers	..				73.0	33.5	27.9	61.4	134.4
Administrative, executive, and managerial			53.8	12.4	*	14.6	68.4
Clerical	45.8	56.5	56.7	113.2	159.0
Sales	45.0	26.2	28.9	55.1	100.0
Farmers, fishermen, timber-getters, etc.	68.5	16.4	3.8	20.2	88.7
Transport and communication	49.5	5.3	*	7.8	57.4
Tradesmen, production-process workers, and labourers, n.e.c. (c)	263.1	18.6	10.8	29.5	292.6
Service, sport, and recreation	42.7	38.0	27.4	65.4	108.1
<u>Total</u>	641.4	206.9	160.3	367.2	1,008.5

(a) Civilians aged 15 years and over.

(b) Never married, widowed, and divorced.

(c) Including miners, quarrymen, and related workers.

Table 11 - Average Hours Worked (a) by Employed Persons (b) by Industry Division
and Status of Worker, Queensland, February 1984

Industry division and status of worker					Males	Married females	Other females (c)	All females	Persons
Agriculture, forestry, fishing, and hunting	..				47.4	30.5	35.1	31.3	43.4
Mining	37.1	*	*	*	36.4
Manufacturing	34.8	27.8	31.2	29.3	33.6
Electricity, gas, and water	30.7	*	*	*	30.1
Construction	36.6	17.3	*	20.2	34.7
Wholesale and retail trade	38.0	29.5	24.9	27.3	33.2
Transport and storage	36.5	18.3	*	23.1	35.0
Communication	31.3	*	*	25.1	29.8
Finance, property, and business services	37.9	25.5	30.1	27.6	33.1
Public administration and defence	32.7	30.6	30.6	30.6	32.1
Community services	36.7	26.1	32.1	28.7	31.8
Recreation and personal and other services	42.0	25.5	25.9	25.7	32.4
<u>Total employed</u>	37.5	26.9	28.7	27.7	33.9
Wage and salary earners	35.3	25.9	28.6	27.2	32.3
Other (d)	46.0	29.8	32.8	30.2	40.9

(a) Persons with jobs who did not work during survey week have been included in the calculation of average hours worked. When recording hours worked, fractions of an hour are disregarded. This procedure results in a slight lowering of the average hours figures. (b) Civilians aged 15 years and over. (c) Never married, widowed, and divorced. (d) Employers, self-employed, and unpaid family helpers.

Table 12 - Employed Persons (a) by Hours Worked (b), Queensland, February 1984
('000)

Hours worked		Number employed				
		Males	Married females	Other females (c)	All females	Persons
0 (d)	..	33.7	9.9	8.6	18.5	52.2
1-15	..	21.0	49.0	22.9	71.9	93.0
16-29	..	54.7	48.9	29.2	78.1	132.8
30-34	..	167.5	36.0	42.3	78.3	245.8
35-39	..	74.4	16.9	16.2	33.1	107.5
40	..	116.8	22.2	26.1	48.3	165.1
41-44	..	26.3	3.9	3.8	7.7	34.0
45-48	..	37.5	4.9	4.9	9.8	47.2
49 and over	..	109.5	15.1	6.3	21.4	130.9
<u>Total</u>	..	641.4	206.9	160.3	367.2	1,008.5

(a) Civilians aged 15 years and over. (b) Actual hours worked during survey week, not hours paid for. The figures may be affected by: public holidays, leave, and absenteeism; temporary absence from work due to sickness, accidents, and industrial disputes; and work stoppages due to bad weather, plant breakdown, etc. (c) Never married, widowed, and divorced. (d) Excluding persons stood down without pay for less than four weeks, including the whole of survey week, for reasons other than bad weather or plant breakdown; these persons are classified as unemployed.

Table 13 - Unemployed Persons and Unemployment Rates (a) by Industry Division, Queensland, November 1982 to February 1984

Industry division (b) and unemployment category	November 1982		February 1983		May 1983		August 1983		November 1983		February 1984

26 weeks and over	10.3	13.2	14.2	15.4	14.6	16.6
<u>Total</u>	34.1	48.4	43.8	38.8	37.9	42.6
				weeks	weeks	weeks	weeks	weeks	weeks
Average (mean) duration of unemployment (b)				26.7	24.2	32.2	29.2	34.4	30.5
Median duration of unemployment (c)				14.7	10.0	17.0	18.4	16.8	12.2
Persons									
Number unemployed				'000	'000	'000	'000	'000	'000
Under 4 weeks	15.9	23.4	15.1	17.8	16.9	20.0
4 and under 8 weeks	12.1	22.5	16.4	15.3	10.5	17.0
8 and under 13 weeks	11.1	25.9	14.3	11.3	9.7	15.0
13 and under 26 weeks	18.1	23.0	26.3	18.1	15.7	14.4
26 weeks and over	23.7	31.0	42.9	47.8	43.0	48.2
<u>Total</u>	80.9	125.8	115.0	110.2	95.8	114.6
				weeks	weeks	weeks	weeks	weeks	weeks
Average (mean) duration of unemployment (b)				24.4	21.1	28.9	31.3	35.2	34.4
Median duration of unemployment (c)				14.0	11.3	18.8	20.7	22.0	17.8

(a) Period from the time the person began looking for work or was stood down, to the end of survey week.

(b) Periods of unemployment are recorded only in completed weeks; this procedure results in a slight lowering of the figures shown for average (mean) duration of unemployment.

(c) Median duration is calculated from group data, linear interpolation being used within the group which contains the median.

Table 16 - Unemployed Persons by Age, Queensland, February 1984

Age group (years)				Number unemployed			Unemployment rate (a)		
				Males	Females	Persons	Males	Females	Persons
				'000	'000	'000	%	%	%
15-19	16.4	14.8	31.2	23.0	20.6	21.8
20-24	16.2	9.8	26.0	16.0	13.1	14.8
25-34	16.5	9.1	25.6	8.6	8.9	8.7
35 and over	22.9	8.9	31.8	6.6	5.5	6.2
<u>Total</u>	72.0	42.6	114.6	10.1	10.4	10.2
Total 20 and over	55.6	27.8	83.4	8.7	8.2	8.5

(a) The number of unemployed in each group as a percentage of the labour force in the same group.
